

## Sample Advantages and Disadvantages

Books and printed materials are being replaced by modern devices such as laptops and tablets in schools. Are the advantages more than the disadvantages?

In this modern world, **electrical gadgets like laptops and tablets** **which** are becoming advanced at a torrential rate *have become an integral element in our lives.*

*It is recently observed that tablets and laptops are replacing the conventional books and other printed resources in many schools.*

This contentious topic has been profoundly debated in several forums.

I will gauge both the advantages and disadvantages meticulously before inclining towards a rational conclusion.

## **Para 1:**

**Throwing light on the advantages, I feel that advancing technologies substituting the pre-existing books and materials is a beneficial thing because it makes the students well accustomed to the modern requirements. Books which can store only limited information do not provide unlimited data unlike its counter-part. Moreover, many experts say that learning will become faster and extremely efficient if such devices are put into use. To illustrate, as per a recent survey, schools which use the modernized resources tend to get more pass percentage.**

## **Conclusion:**

### **NOUN CLAUSE + ADVERB CLAUSE**

**To conclude, I strongly opine that it is inevitable for the modern gadgets to replace the traditional resources although it has few notable demerits.**
